THESIS: HHS should not allow the use of cell phones at all times because it would cause distraction, encourage cyberbullying, and decrease socialization among students.

If students use phones all of the time, they will be distracted all of the time too. Students will focus more on their phones instead of on the lesson. This will result in students failing classes and not knowing what they need to know. Also, teachers will be distracted too because they will be constantly asking students to pay attention. If the teacher can't teach, this will influence other students. Unlimited phone use would have negative effects for the student using the phone, other students, and the teacher.
